### Chapter 116. Pick N

#### §11601. Description; Selection; Principle

A. The Pick N is a form of pari-mutuel wagering where N is a varying number of races exceeding three races. Bettors select the first horse in each of N consecutive races designated as the Pick N by the permit holder. The principle of a Pick N is in effect a contract by the purchaser of a Pick N ticket to select the winners of each of the N races designated as the Pick N. The sale of Pick N tickets other than from pari-mutuel machines shall be deemed illegal and is prohibited.

AUTHORITY NOTE: Promulgated in accordance with R.S. 4:149, R.S. 4:149.1 and R.S. 4:149.2.

HISTORICAL NOTE: Promulgated by the Office of the Governor, Division of Administration, Racing Commission, LR 28:1014 (May 2002), amended LR 34:869 (May 2008), LR 45:1594 (November 2019).

#### §11609. Procedure

A. The Pick N requires selection of the first-place finisher in each of a designated number of contests. The association shall submit their request for Pick N pool wagering in writing to the commission at the time of application for race dates and include the request in their wagering format application. The association must obtain written approval from the commission concerning the scheduling of Pick N contests, the designation of one of the methods prescribed in Subsection B, and the amount of any cap to be set on the carryover. Any changes to the approved Pick N

format require prior approval from the commission at the time of application for race dates.

B. The Pick N pool shall be apportioned under one of the following methods:

1. Method 1, Pick N with Carryover: The net Pick N pool and carryover, if any, shall be distributed as a single price pool to those who selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. If there are no such wagers, then a designated percentage of the net pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests; and the remainder shall be added to the carryover. Where there is no correct selection of the first-place finisher in at least one of the Pick N contests, based upon the official order of finish, the day's net pool shall be refunded and the previous carryover pool amount, if any, shall be carried over to the next scheduled corresponding pool.

2. Method 2, Pick N with 100 percent Carryover: The net Pick N pool and carryover, if any, shall be distributed as a single price pool to those who selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. If there are no such wagers, then 100% of that day's net pool shall be added to the carryover. Where there is no correct selection of the first-place finisher in at least one of the Pick N contests, based upon the official order of finish, the day's net pool shall be refunded and the previous carryover pool amount, if any, shall be carried over to the next scheduled corresponding pool.

3. Method 3, Pick N with Minor Pool and Carryover: The major share of the net Pick N pool and the carryover, if any, shall be distributed to those who selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. The minor share of the net Pick N pool shall be distributed to those who selected the first-place finisher in the second greatest number of Pick N contests, based upon the official order of finish. If there are no wagers selecting the first-place finisher of all Pick N contests, the minor share of the net Pick N pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests; and the major share shall be added to the carryover. Where there is no correct selection of the first-place finisher in at least one of the Pick N contests, based upon the

official order of finish, the day's net pool shall be refunded and the previous carryover pool amount, if any, shall be carried over to the next scheduled corresponding pool.

4. Method 4, Pick N with No Minor Pool and No Carryover: The net Pick N pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests, based upon the official order of finish. If there are no winning wagers, the pool is refunded.

5. Method 5, Pick N with Minor Pool and No Carryover: The major share of the net Pick N pool shall be distributed to those who selected the first place finisher in the greatest number of Pick N contests, based upon the official order of finish. The minor share of the net Pick N pool shall be distributed to those who selected the first-place finisher in the second greatest number of Pick N contests, based upon the official order of finish. If there are no wagers selecting the first-place finisher in a second greatest number of Pick N contests, the minor share of the net Pick N pool shall be combined with the major share for distribution as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests. If the greatest number of first-place finishers selected is one (1), the major and minor shares are combined for distribution as a single price pool. If there are no winning wagers, the pool is refunded.

6. Method 6, Pick N with Minor Pool and No Carryover: The major share of net Pick N pool shall be distributed to those who selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. The minor share of the net Pick N pool shall be distributed to those who selected the first-place finisher in the second greatest number of Pick N contests, based upon the official order of finish. If there are no wagers selecting the first-place finisher in all Pick N contests, the entire net Pick N pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests. If there are no wagers selecting the first-place finisher in a second greatest number of Pick N contests, the minor share of the net Pick N pool shall be combined with the major share for distribution as a single price pool to those who selected the first-place finisher in each of the Pick N contests. If there are no winning wagers, the pool is refunded.

7. Method 7, Pick N with Carryover and "Unique Winning Ticket" Provision: The net Pick N pool and carryover, if any, shall be distributed to the holder of a unique winning ticket that selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. If there is no unique ticket selecting the first-place finisher in each of the Pick N contests, or if there are no wagers selecting the first-place finisher of all Pick N contests, the minor share of the net Pick N pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests, and the major share shall be added to the carryover. Associations may suspend previously approved unique winning ticket wagering with the prior approval of the commission. Any carryover shall be held until the suspended unique winning ticket wagering is reinstated. Where there is no correct selection of the first-place finisher in at least one of the Pick N contests, based upon the official order of finish, the day's net pool shall be refunded and the previous carryover pool amount, if any, shall be carried over to the next scheduled corresponding pool. In obtaining authorization for operating the Pick N pool under this subsection, associations must clearly identify which definition under Subsection L will be relied upon for determining the existence of a unique winning ticket.

8. Method 8, Pick N with the Pool split into three shares, one share having a Carryover: The share percentages are determined by the pool host and approved by the commission. The first share of the net Pick N pool and the carryover, if any, shall be distributed to those who selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. The second share of the net Pick N pool shall be distributed to those who selected (N-1) of the Pick N contests, based upon the official order of finish and a third share of the Pick N pool shall be distributed to those who selected (N-2) of the Pick N contests, based upon the official order of finish. If there are no wagers selecting the first-place finisher of all Pick N contests, the first share shall be added to the carryover. If there are no wagers selecting (N-1) of the Pick N contests, this second share shall be added to the carryover. If there are no wagers selecting (N-2) of the Pick N contests, this third share shall be added to the carryover. Where there is no correct selection of the first-place finisher in at least one of the Pick N contests, based upon the

official order of finish, the day's net pool shall be refunded and the previous carryover pool amount, if any, shall be carried over to the next scheduled corresponding pool.

9. Method 9, Pick N with the pool split into three shares, with Carryovers, and a Unique Winning Ticket Provision: The share percentages are determined by the pool host and approved by the commission. The first share of the net Pick N pool and the first share carryover, if any, shall be distributed to those who selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. The second share of the net Pick N pool shall be distributed to those who selected the first-place finisher in the second greatest number of Pick N contests, based upon the official order of finish. If there are no wagers selecting the first-place finisher of all Pick N contests, the second share of the net Pick N pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests, and the first share shall be added to the first share carryover. The third share and the third share carryover, if any, shall be distributed to the holder of a unique winning ticket that selected the first-place finisher in each of the Pick N contests, based upon the official order of finish. If there is no unique winning ticket selecting the first-place finisher in each of the Pick N contests, the third share shall be added to the third share carryover. For greater certainty, the holder of a unique winning ticket shall receive both the first share, and first share carryover, if any as well as the third share, and the third share carryover, if any. Where there is no correct selection of the first-place finisher in at least one of the Pick N contests, based upon the official order of finish, the day's net pool shall be refunded and the previous carryover pool(s) amount(s), if any, shall be carried over to the next scheduled corresponding pool. In obtaining authorization for operating the Pick N pool under this subsection, associations must clearly identify which definition under paragraph 16(b) will be relied upon for determining the existence of a unique winning ticket.

C. If there is a dead heat for first in any of the Pick N contests involving:

1. contestants representing the same betting interest, the Pick N pool shall be distributed as if no dead heat occurred.

2. contestants representing two or more betting interests, the Pick N pool shall be distributed as a single price pool with each winning wager receiving an equal share of the profit.

D. If a wagering interest is "scratched" for a Pick N contest, or is designated to run for purse money only, the association shall use the actual favorite, as evidenced by total amounts wagered in the Win pool at the host association for the contest at the close of wagering on that contest, and shall be substituted for the scratched betting interest for all purposes, including pool calculations. In the event that the Win pool total for two or more favorites is identical, the substitute selection shall be the betting interest with the lowest program number. The totalizator shall produce reports showing each of the wagering combinations with substituted betting interests which became winners as a result of the substitution, in addition to the normal winning combination.

E. Subject to Subsection I, J or L, the Pick N pool shall be cancelled and all Pick N wagers for the individual performance shall be refunded if:

1. at least three contests included as part of a Pick 4 N, Pick 5 N or Pick 6 N are cancelled or declared no contest.

2. at least four contests included as part of a Pick 7 N, Pick 8 N or Pick 9 N are cancelled or declared no contest.

3. at least five contests included as part of a Pick 10 N are cancelled or declared no contest.

F. Subject to Subsection I, J or L, if at least one contest included as part of a Pick N is cancelled or declared no contest, but not more than the number specified in Subsection E of this Section, the net pool shall be distributed as a single price pool to those whose selection finished first in the greatest number of Pick N contests for that performance. Such distribution shall include the portion ordinarily retained for the Pick N carryover but not the carryover from previous performances.

G. If the condition of the course warrants a change of racing surface in any of the legs of the Pick N races, and such change was not known to the public prior to the closing of wagering for the Pick N pool, the stewards shall declare the changed leg(s) an all win for Pick N wagering purposes only.

H. The Pick N carryover may be capped at a designated level approved by the commission so that if, at the close of any performance, the amount in the Pick N carryover equals or exceeds the designated cap,

the Pick N carryover will be frozen until it is won or distributed under other provisions of this rule. After the Pick N carryover is frozen, 100 percent of the net pool, part of which ordinarily would be added to the Pick N carryover, shall be distributed to those whose selection finished first in the greatest number of Pick N contests for that performance. Any request for a designated cap shall be submitted to the commission in writing at the time of application for race dates and included in the wagering format application.

I. Any request for permission to distribute the Pick N carryover on a specific performance shall be submitted to the commission in writing at the time of application for race dates and included in their wagering format application. The request must be for a specified date.

J. Should the Pick N carryover be designated for distribution on a specified date and performance in which there are no wagers selecting the first-place finisher in each of the Pick N contests, the entire pool shall be distributed as a single price pool to those whose selection finished first in the greatest number of Pick N contests. The Pick N carryover shall be designated for distribution on a specified date and performance only under the following circumstances:

1. Upon written approval from the commission as provided in Subsection H of this rule.

2. On the closing performance of the meet or split meet.

K. Unless otherwise stated in writing by the commission under Subsection I, on the last Pick N race on the final day of the meeting, the net pool, including any applicable carryover, shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests, based upon the official order of finish.

L. As it relates to any distribution method under Subsection B, which contains a unique winning ticket provision:

1. A written request for permission to distribute the Pick N unique winning ticket carryover on a specific performance shall be submitted to the commission in writing at the time of application for race dates and included in their wagering format application. The request must contain justification for the distribution, an explanation of the benefit to be derived, and the intended date and performance for the distribution. Should the Pick N unique winning ticket net pool and any applicable carryover be designated for distribution on a specified date and

performance in which there is no unique winning ticket, the entire pool shall be distributed as a single price pool to those who selected the first-place finisher in the greatest number of Pick N contests.

2. Associations must clearly identify which selection under Subparagraphs a and b below will be relied upon for determining the existence of a unique winning ticket:

- a. there is one and only one winning ticket that correctly selected the first place finisher in each of the Pick N contests, based upon the official order of finish, to be verified by the unique serial number assigned by the tote company that issued the winning ticket; or

- b. the total amount wagered on one and only one winning combination selecting the first-place finisher in each of the Pick N contests, based upon the official order of finish, is equal to the minimum allowable wager.

G. All wagers offered on historical horse races shall incorporate the following elements:

1. A patron may only wager on historical horse races on a terminal approved by the commission;

2. For each different type of exotic wager on historical horse races offered by an association, the association shall at all times maintain at least two terminals offering each such exotic wager;

3. Once a patron deposits an amount in the terminal offering wagering on historical horse races, one or more historical horse races shall be made available for wagering as set forth in the wagering specification rules;

4. Prior to the patron making his or her wager selections, the terminal shall not display any information that would allow the patron to identify the historical horse race or races on which he or she is wagering, including the location of the race or races, the date on which the race or races was run, the names of the horses in the race or races, or the names of the jockeys that rode the horses in the race or races;

### **§13115. Historical Horse Race Specification and Selection Requirements**

A. The outcome of any historical horse race wager shall be derived from the result of one or more historical horse races.

B. All historical horse races must be chosen at random from a database of actual historical horse races. All races in the database shall have a valid historical horse race result with details recorded at the same level as other races in the database, and shall include:

1. race location;
2. race date; and
3. finishing order.

C. If available and provided for in the recorded race data, other information such as horse name and jockey name or associated identifiers may be included in the race database.

D. In the case where a random process is used to select the historical horse races for a wager, all possible races in the database shall be available for selection.

E. Each terminal shall:

1. be tested by an independent testing laboratory, selected by the commission, and found to be in compliance with all applicable technical standards. Any modifications made to the terminal or software shall require re-testing;
2. provide race information that is current as of the day the horse race was actually run;
3. allow any patron that is handicapping to exit the manual handicapping interface;
4. display the information provided to the patron in graphic form which is discernable to the bettor;

5. not be in the nature of a slot machine. A terminal shall not be considered to be in the nature of a slot machine when it precludes the use of random elements to determine the outcome of a wager other than the selection of a race or races from a database of races, when all wagers and prizes are pari-mutuel in nature, and when it does not include any interest of the licensee.

F. Prior to the patron making his or her wager selections, the terminal shall:

1. make true and accurate past performance information available on each historical horse race; and

2. not display any information that would allow the patron to identify the historical horse race on which the patron is wagering, including:

- a. the location of the race;
- b. the date on which the race was run;
- c. the names of the horses in the race; or
- d. the names of the jockeys who rode the horses in the race.

G. In addition to the requirement of Paragraph 2 of Subsection F of this Section, the terminal may also display the wager and its outcome as part of an entertaining display, provided the underlying wager and outcome functions according to the pari-mutuel wagering pool specifications provided by the historical horse racing licensee to the commission.

H. Approximate odds or payouts for each wagering pool shall be posted, or made available, on each terminal for viewing by patrons.

B. A payout to a winning patron shall be paid from money wagered by patrons and shall not constitute a wager against the association.

C. An association conducting wagering on historical horse races shall not conduct wagering in such a manner that patrons are wagering against the association, or in such a manner that the amount retained by the association as a commission is dependent upon the outcome of any particular race or the success of any particular wager.

D. An association offering wagering on historical horse races shall operate a pari-mutuel pool or pools in a manner and method approved by the commission. An association offering wagering on historical horse races may operate a player-funded pool or pools in a manner and method approved by the commission for the purpose of ensuring that sufficient funds are at all times available to pay any winning wagers in situations where a pari-mutuel pool becomes a minus pool. For each wager made, an association may assign a

percentage of the wager to a player-funded pool or pools.

E. If an association chooses to make a deposit into a trust account or seed pool for the purpose of ensuring that sufficient funds are at all times available to pay any winning wagers in situations where a pari-mutuel pool becomes a minus pool, then such trust account must be approved by the commission.

AUTHORITY NOTE: Promulgated in accordance with R.S. 4:141, R.S. 4:142 and R.S. 4:148.

### **§13121. Responsible Play**

A. A licensee shall implement a program to promote responsible play of historical horse racing by its patrons and provide details of the same to the commission. At a minimum, such program shall require:

1. posting in a conspicuous place in every facility where pari-mutuel wagering on historical horse racing is conducted a sign that bears a toll-free number for an approved organization that provides assistance to problem gamblers;
2. providing informational leaflets or other similar materials at the licensee's facilities on the dangers associated with problem gambling;
3. including in the licensee's promotional and marketing materials information on problem gambling and organizations that provide assistance to problem gamblers;
4. providing patrons expressing concern with a gambling problem with information on organizations that provide assistance to problem gamblers; and
5. ensuring that any request by a patron who wishes to self-exclude from the licensee's facilities is honored by the licensee.

B. A licensee shall report annually to the commission and make a copy available to the public on

its efforts to meet Subsection A of this Section, its efforts to identify problem gamblers, and steps taken to:

1. prevent such individuals from continuing to engage in pari-mutuel wagering on historical horse racing; and
2. provide assistance to these individuals to address problem gambling activity.

AUTHORITY NOTE: Promulgated in accordance with R.S. 4:141, R.S. 4:142 and R.S. 4:148.

### **§13123. Totalizator or Other Approved Equipment Required**

A. Pari-mutuel wagering on historical horse races shall only be conducted through the use of a totalizator or other similar mechanical or electrical equipment.

B. The totalizator or other mechanical or electrical equipment shall be available for testing under the supervision of the commission upon request by the commission to ensure its proper working order.

C. Wagering on historical horse races shall be offered on terminals that include a cabinet in which the electronics and other operating components are located. All terminals and other equipment shall be subject to inspection by the commission.

D. The terminal cabinet and electronics shall:

1. protect against electrostatic interference by being grounded so that static discharge energy shall not permanently damage or inhibit the normal operation of the electronics or other components within the wagering terminal. In the event that a temporary disruption of the normal operation of a wagering terminal occurs as a result of an electrostatic discharge, the wagering terminal shall have the capacity to recover and complete any interrupted wager without loss or corruption of any control or critical data information. Each terminal shall be tested to a maximum discharge severity level of 27 kilovolt air discharge;
2. not be adversely affected, other than during resets, by surges or dips of up to 20 percent of the supply voltage. If a wagering terminal is designed such that a surge or dip of up to 20 percent of the supply voltage causes a reset, the terminal shall also be designed so that a surge or dip shall not result in damage to the equipment or loss or corruption of data. Upon reset, the wager play shall return to its previous

state or return to a wager completion state, provided the wagering history and all credit and accounting meters comprehend a completed wager play;

3. have an on/off switch that controls the electrical current installed in a readily accessible location within the interior of the terminal so that power cannot be disconnected from outside of the terminal using the on/off switch. The on/off positions of the switch shall be labeled;

4. be designed so that power and data cables into and out of the terminal can be routed so that they are not accessible to the general public. Security-related wires and cables that are routed into a logic area shall be securely fastened within the interior of the terminal;

5. have an identification badge affixed to the exterior of the terminal by the terminal provider that is not removable without leaving evidence of tampering. This badge shall include the following information:

- a. the name of the terminal provider;
- b. a unique serial number;
- c. the terminal model number; and
- d. the date of manufacture;

6. have an external tower light located conspicuously on the top of the terminal that automatically illuminates when a patron has won an amount that the terminal cannot automatically pay or when an error condition has occurred;

7. be constructed of materials that are designed to allow only authorized access to the inside of the terminal. The terminal and its locks, doors, and associated hinges shall be capable of withstanding determined and unauthorized efforts to gain access to the inside of the terminal and shall be designed to leave evidence of tampering if such an entry is made;

8. be equipped with doors of a locked area that are designed to resist the use of tools or other objects used to breach the locked area by physical force;

9. have external doors that shall be locked and monitored by door access sensors. When the external doors are opened, the door access sensors shall:

- a. cause wagering activity to cease;
- b. disable all currency acceptance;
- c. enter an error condition;
- d. illuminate the tower light at a minimum;

and

e. record the error condition. The requirements of this Subsection do not apply to the drop box door;

10. have external doors designed so that it shall not be possible to insert a device into the terminal that will disable a sensor that indicates "door open" without leaving evidence of tampering when the door of the terminal is shut;

11. have a sensor system that shall provide notification that an external door is open when the door is moved from its fully closed and locked position, provided power is supplied to the device;

12. have a logic area, which is a separately locked cabinet area with its own monitored, locked door or other monitored, locked covering that houses electronic components that have the potential to significantly influence the operation of the terminal. There may be more than one such logic area in a terminal. The electronic components housed in the logic area shall include:

a. a central processing unit and any program storage device that contains software that may affect the integrity of wagering, including the individual play accounting, system communication, and peripheral firmware devices involved in or that significantly influence the operation and calculation of wager plays, wager outcome display, wager result determination, or wager play accounting, revenue, or security;

b. communication controller electronics and components housing the communication program storage device; and

c. the nonvolatile memory backup device, which if located in the logic area, shall be kept within a locked logic area; and

Access to the currency storage area shall be secured by two locks before the currency can be removed. The locks shall be located on the relevant outer door and on at least one other door.

E. Critical memory requirements shall include the following:

1. Critical memory storage shall be maintained by a methodology that enables errors to be identified, including signatures, checksums, partial checksums, multiple copies, timestamps, effective use of validity codes, or any combination of these methods.

2. Comprehensive checks of critical memory shall be made following wager play initiation but prior to display of wager outcome to the patron.

3. An unrecoverable corruption of critical memory shall result in an error state. The memory error

shall not be cleared automatically and shall cause the terminal to cease further functioning. The critical memory error shall also cause any communication external to the terminal to immediately cease. An unrecoverable critical memory error shall require restoration or clearing of software state by an authorized person.

4. If critical memory is maintained in nonvolatile memory on the terminal and not by the server-based system, then:

a. the terminal shall have the ability to retain data for all critical memory as defined in this Section and be capable of maintaining the accuracy of the data for 30 days after power is discontinued from the terminal;

b. for rechargeable battery types only, if the battery backup is used as an off-chip battery source, it shall recharge itself to its full potential in a maximum of 24 hours, and the shelf life of the battery shall be at least five years;

c. nonvolatile memory that uses an off-chip backup power source to retain its contents when the main power is switched off shall have a detection system that will provide a method for software to interpret and act upon a low battery condition before the battery reaches a level where it is no longer capable of maintaining the memory in question. Clearing nonvolatile memory shall require access to the locked logic area or other secure method, provided that the method is approved by the commission; and

d. following the initiation of a nonvolatile memory reset procedure, the wagering program shall execute a routine that initializes all bits in critical nonvolatile memory to the default state. All memory locations intended to be cleared as per the nonvolatile memory clear process shall be fully reset in all cases.

5. Critical memory of a server-based wager configuration may be maintained by the server, terminal, or some combination thereof. The critical memory related to each terminal shall:

a. be kept independent to all other wagering terminals. If corruption occurs in any single terminal's critical memory no other terminal shall be effected by the terminal's corrupt memory state; and

b. be clearly identified as to which physical terminal the critical memory represents, through unique identification, such as serial number or other unique terminal hardware identifier.

6. All terminals shall be equipped with a device, mechanism, or method for retaining the value of the

meter information specified in §13135 in the event of a loss of power to the terminal. Storage and retrieval of the accounting meters from a server is an acceptable method of retrieval.

7. Configuration setting changes shall not cause an obstruction to the meters.

8. If the terminal is in a test, diagnostic, or demonstration mode, any test that incorporates credits entering or leaving the terminal shall be completed prior to resumption of normal operation. In addition, there shall not be any mode other than normal wagering operation that debits or credits any of the electronic meters. Any wagering credits on the terminal that were accrued during the test, diagnostic, or demonstration mode shall be cleared before the mode is exited. Specific meters are permissible for these types of modes, provided the meters are clearly identified.

9. Terminals shall not allow any information contained in a communication to or from the online monitoring system that is intended to be protected, including validation information, secure personal identification numbers, credentials, or secure seeds and keys, to be viewable through any display mechanism supported by the terminal.

F. Program storage devices shall be required to comply with the following.

1. All program storage devices shall:

a. be housed within a fully enclosed and locked logic compartment;

b. validate themselves during each processor reset; and

c. validate themselves the first time they are used.

2. Program storage devices that do not have the ability to be modified while installed in the terminal during normal operation shall be clearly marked with information to identify the software and revision level of the information stored in the devices.

3. Server-stored information shall be backed up no less often than once per day to an offsite storage facility. Offsite storage may include storage through a cloud service provider if approved by the commission. The server and offsite backup storage shall be accessible to the commission and subject to third-party checks and validation.

AUTHORITY NOTE: Promulgated in accordance with R.S. 4:141, R.S. 4:142 and R.S. 4:148.

C. Terminals shall be capable of detecting and displaying the following errors:

1. open door conditions;
2. nonvolatile memory errors;
3. low nonvolatile memory battery for batteries external to the nonvolatile memory itself for low power source;
